PROFILE SUMMARY

3rd-year Computer Science and Engineering undergraduate with strong foundations in full-stack development, programming, and database management. Proficient in building MERN stack applications and delivering effective, problem-solving software solutions. Skilled in C, Java, Python, and SQL, with a keen interest in product engineering, AI-driven systems, and user-centric application development. Pursuing a minor degree in Robotics and Automation.

TECHNICAL SKILLS

Languages:	Python, Java, C, JavaScript
Web Technologies:	HTML, CSS, React.js, Node.js, Express.js
Databases:	SQL, MongoDB
Tools:	Git, GitHub, VS Code, Postman
Concepts:	OOP, REST APIs, Data Structures & Algorithms, DBMS, Mobile App Development, UML Modeling

EXPERIENCE

Full Stack Developer Intern — *NeST Technologies* June 2025 – July 2025

- Developed and deployed web applications using the MERN stack within team-based development workflows.
- Integrated REST APIs and optimized database management to improve application data flow.
- Collaborated actively with team members on design discussions and technical project requirements.

Industrial Visit Trainee — *Experion Technologies* August 2025

- Gained exposure to corporate software engineering processes, emerging technologies, and industry standards.
- Deepened technical knowledge regarding AI applications and how they align with current market trends.

PROJECTS

Micro-Alert — *Hyperlocal Disaster Management System* [GitHub Project](#)

- Developed a hyperlocal disaster management system delivering precise, real-time alerts tailored to user location.
- Integrated geo-tagged reporting and AI-based verification models to classify risks and filter false information.
- Enabled targeted notifications and streamlined access to nearby emergency resources like shelters and medical aid.
- Tech stack: React, Node.js, AI Verification, Geolocation, MongoDB, Express.js

SkyLytix — *NASA Space Apps Challenge* [GitHub Project](#)

- Built a weather intelligence platform providing location-based insights by analyzing NASA Earth observation data.
- Processed complex environmental data streams, including temperature, wind speed, and solar parameters.
- Tech stack: React, Python, NASA APIs, Data Visualizations

FindMyDonor — *MERN Stack Project* [GitHub Project](#)

- Developed a full-stack web application connecting blood donors with recipients using location and blood group-based search.
- Implemented secure donor registration modules, secure profiles, and dynamic contact features.
- Tech stack: React, Node.js, MongoDB, Express.js

NutriShe — *MERN Stack Project* [GitHub Project](#)

- Built a MERN stack web application for nutrition tracking, grocery management, and leftover recipe recommendations, featuring secure authentication and a responsive user-friendly interface.
- Tech stack: React, Node.js, MongoDB, Express.js

EDUCATION

St. Joseph's College of Engineering and Technology, Palai Expected graduation- 2027

B.Tech in Computer Science & Engineering • CGPA: 9.32 / 10 • Minor in Robotics and Automation

Holy Cross Higher Secondary School, Cherpunkal 2021 – 2023

Higher Secondary (12th, Bio-Maths) • Grade: 97.16%

CERTIFICATIONS

NPTEL: Fundamentals of AI (Elite + Silver) | Privacy & Security in Online Social Media | Wheeled Robots (Elite)

Infosys Springboard: Software Engineering | IT Fundamentals: OS | Data Structures | Java Fundamentals

ACTIVITIES & EXTRACURRICULARS

Leadership & Volunteering: Regional Coordinator for the National Resource Protection Force (ALPY-IDK-KTM) | National Service Scheme (NSS) Volunteer | TEDx Event Volunteer.

Hackathons & Workshops: Attended advanced AI/ML Workshop at NIT and participated in various technical hackathons.

LANGUAGES

English, Malayalam, Hindi.
